DUSTOFF DRILL BITS

RESISTANT MATERIALS
INTENSIVE USE

■ INNOVATION

Thanks to its drilling experience, Tivoly brings to its users a new understanding of the problems of improving working conditions and productivity. Tivoly innovates by launching its first drill bits with integrated dust extraction. Simple implementation and amazing results!

■ HEALTH

Tivoly supports efforts to reduce workplace risks. Dust inhaled by users can cause serious illness. It is suspected of being carcinogenic. This is why everything must be done to avoid it.

■ PRODUCTIVITY

The DUSTOFF TIVOLY drill bit combines two steps in one. It drills and sucks dust. Connected to an industrial vacuum *, it eliminates the tedious operations of cleaning of the holes and the site.

■ CERTIFIED

The drill bit DUSTOFF TIVOLY is ideal for the implementation of chemical plugs, it is certified for systems of injection with mastic. The DUSTOFF drill bit is also recommended for installing ankle-free concrete screws and dowels.

Shank
SDS+
SDSmax

Suction sleeve adaptable to
any industrial vacuum
cleaner.

Maximized suction holes
98% of the dust removed

Fusible high-strength carbide
inserts
Special geometry reducing to
ultra-fine powder dust.

DUSTOFF DRILL BITS

RESISTANT MATERIALS
INTENSIVE USE

APPLICATIONS

Drilling for fastenings by:
- Concrete screw without ankle.
- Anchor studs
- Chemical anchors

Drilling of reinforced concrete
frame connections by
reinforcement connection.

Drilling in a clean environment:
Schools
Hospitals
Computer rooms
Furnished dwellings

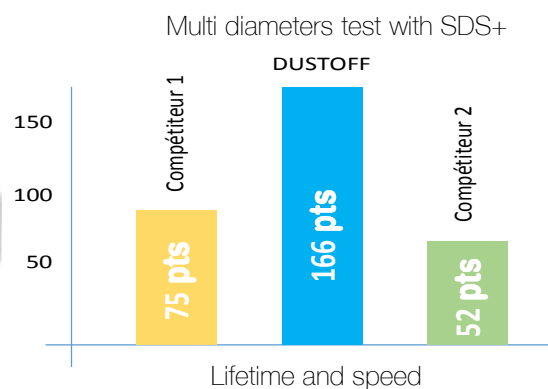

Drilling in poorly ventilated
rooms

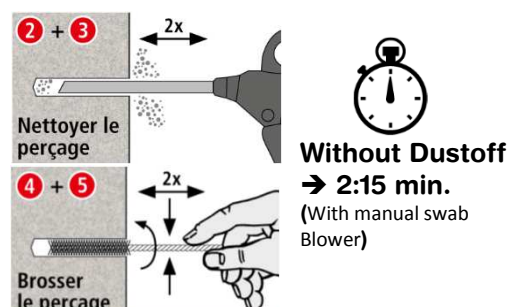

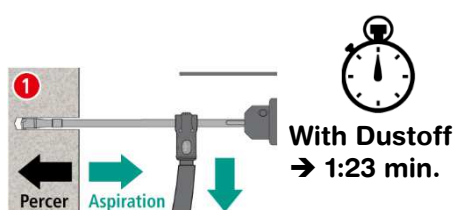

PERFORMANCE

NEW
fischer
innovative solutions
Certifié avec les systèmes
d'injection au mastic
FIS EM, FIS V, FAZ II
et Superbond

Time to install a chemical anchor
